PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and B. Tech Information Technology graduate with a portfolio of 4+ independently delivered data projects spanning SQL, Power BI, Excel, and Python. Skilled in data cleaning, EDA, predictive modeling, and dashboard development, with a proven ability to troubleshoot data issues and translate stakeholder requirements into decision-ready reporting.

KEY SKILLS

Data Analytics & BI: Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Predictive Modeling, Regression & Classification, Statistical Analysis, Data Visualization, Data Storytelling, KPI Reporting, Business Intelligence

Languages & Databases: Python, SQL, MySQL, Java

Analytics Tools: Pandas, NumPy, Matplotlib, Scikit-learn, Power BI, Power Query, DAX, Microsoft Excel (Pivot Tables), Git, Jupyter Notebook, Google Collab

Core Competencies: Requirements Gathering, Data-Driven Decision Support, Cross-Functional Collaboration, Attention to Detail, Communication

EXPERIENCE

Software Engineer Intern | Ibee Analytics, Hyderabad

Sep 2025 – Nov 2025

- Gathered stakeholder requirements from cross-functional teams and translated them into design and reporting updates delivered end to end.
- Supported client campaign work by producing structured visual reporting assets in Figma and Canva.

Data Science Intern | Big Learn, Tiruchirappalli

Jan 2025 – Feb 2025

- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) on real-world datasets, diagnosing and correcting data quality issues (missing values, inconsistent formats, outliers) to produce a clean, analysis-ready dataset for downstream reporting.
- Generated actionable insights using Python-based analytics tools, building working knowledge of data visualization and end-to-end analytical workflows.

PROJECTS

Online Food Delivery Database Analysis | MySQL, SQL

- Designed an Entity-Relationship diagram and built 5 relational tables (customers, restaurants, menu items, orders) with primary/foreign key constraints as part of the Data Pencil SQL Bootcamp.
- Authored 10+ business-driven SQL queries (CTEs, subqueries, joins, CASE WHEN, window functions, views, stored procedures) and delivered a portfolio-ready report on top-selling items, customer activity, and sales trends.

Power BI Sales & Profit Performance Analysis | Power BI, Power Query, DAX

- Built an end-to-end BI workflow covering data collection, cleaning, transformation, data modeling, and DAX-based measures.
- Designed interactive slicers, KPI cards, and dashboard visualizations to surface sales and profit trends for data-driven decision-making.
- Troubleshoot data model relationship and DAX measure errors during development to ensure accurate reporting.

Financial Analytical Dashboard & Sales Dashboard | Power BI, Microsoft Excel, Power Query, DAX

- Developed interactive financial and sales dashboards with KPI cards (Total Sales, Tax, Quantity, Profit) and multi-chart visualizations, using bar, pie, line, and column charts with slicers by gender, customer type, and city.
- Built relational data models linking multiple datasets and validated results with Excel Pivot Tables prior to import into Power BI.

Data Science & Machine Learning Projects (4 Models) | Python, Scikit-learn, Pandas

- Built classification and regression models for Titanic survival prediction and movie rating prediction, and a course recommendation engine, using Scikit-learn and Pandas.
- Weather Prediction using Machine Learning — cleaned and pre-processed historical weather data, engineered features, and trained multiple models; debugged data errors through iterative testing.

EDUCATION

B. Tech, Information Technology

University College of Engineering, BIT Campus, Anna University, Tiruchirappalli | Nov 2022 – May 2026 | CGPA: 8.2

CERTIFICATIONS

Generative AI in Action (IBM Skills Build) • Data Science Essentials (Reliance Foundation Skilling Academy) • Data Visualisation (Tata Group) • Python & Matplotlib (Infosys Springboard) • Data Cleaning (Kaggle)
